<b>Root Magic</b>	½ tsp	½ tsp	½ tsp	½ tsp	½ tsp	½ tsp	½ tsp	½ tsp	-

**MIXING & GROWING TIPS:**

- Never mix pure concentrations of any nutrient, always add to water first.
- If using additional supplements like Gold Shield and CalMag, add these products to your nutrient solution first. Then add Elite Micro, Elite Grow, Elite Bloom, VitaBlue, Early Bloomer, Liquid Blue, and Easy Weed. Then adjust the pH of your nutrient solution before adding Root Magic.
- Maintain the temperature of grow room (if applicable) between 60° F to 84° F.
- Maintain the relative humidity of grow room (if applicable) between 40%-60%.

**For Cannabis Grown in Soil:**

- Plants grown in soil should have a nutrient solution with a pH between 6.2 and 7.
- Feed plants in soil up to twice a week. Large plants (particularly outdoor plants) may require feeding with every watering.

**For Cannabis Grown in Hydroponic/Aeroponic/Soil-Less Media:**

- Adjust and maintain the pH of the nutrient solution between 5.5 and 6.2 for plants grown in soil-less media.
- Keep the nutrient solution aerated.
- Change the nutrient solution in the reservoir every 7-10 days.
- Flush system with clean water every 2 weeks to prevent nutrient build up (optional)
- Soil-less media includes coco coir, rockwool, clay pellets, gravel, perlite, vermiculite, etc.
